## Friday 22nd January 2021

Many Happy Returns to all the children who are celebrating their birthdays this week

Pippa P4

Emily P4

This week across the School and at home, we have enjoyed taking part in a super initiative to show our appreciation and support for the NHS and key workers. Daffodils are placed in the window to symbolise strength and resilience and as a sign of hope and new beginnings. Here are some of our photographs.

As part of live Mathematics lessons in Reception this week, the children have been learning about 2 dimensional shapes. During one of our lessons, the children enjoyed a practical activity where they were required to cut out 2D shapes to make symmetrical snowflakes and monster/alien masks. Here are a selection of the lovely creations produced. Well done, everyone—including Mrs Pierce!

Please keep sending in your daffodil pictures and any home learning pictures. We love to see them and share them on our Weekly Bulletin, social media and website. Just email them to Miss Co-hoon at [secretary@wilmslowprep.co.uk](mailto:secretary@wilmslowprep.co.uk).

### Congratulations to this week's

## Stars of the Week!

Our staff would still like to celebrate their Stars of the Week while we are managing learning remotely and teaching in School

**Rec:** Bodie for creating an interesting fact file about birds on Seesaw.

**P1:** Ted C for attending every Zoom lesson and for trying his best. Keep up the great work!

**P2:** Bertie for fully embracing all aspects of online learning. He has also completed all of his work and presented it beautifully!

**P3:** Grace for always trying her best and being a delightful member of the class.

**P4:** Safa for settling in to School so well under unusual circumstances and trying very hard in all her online lessons.

**P5:** Maddie for her excellent evacuee letter.

All P6 deserve congratulations for getting through a week of many entrance exams, auditions and practice interviews with smiles on their faces.

### ~~~~~ P4 Fact of the Week ~~~~~

A hammerhead shark's head is flattened into a hammer shape called a cephalofoil which gives them 360 degree vision and uses electrical senses to find food like squid and stingrays.
